

## **Liquiloans**

Based on the analysis I have the following queries:

1. How is the registration of investors being approved and what are the required parameters that are needed to be an investor?
2. How are the borrowers assigned to the related investors?
3. What is the criteria to give a loan to the borrower?
4. What is the difference between loan amount and invested amount?
5. How can the investor decide how much he can spend for the borrower ?
6. Is it possible to take investment from multiple investors for a single loan?
7. How and from where an agreement document is being generated for an investor?
8. How is the return summary calculated?
9. How and on what basis the interest summary is being calculated if the investor has invested in multiple loans?
10. How the market place data is being populated and on which basis?
11. How the loan is being applied and the borrower 's profile is being managed?
12. Is it possible for an investor to view the borrower profile?
13. What is the use of a Nominee for an investor?
